Subject: One more thing on Dimock

Sorry.

Cabot just released a statement, that includes this line: "Importantly, the EPA again did not indicate that those contaminants that were detected bore any relationship to oil and gas development in the Dimock area, particularly given the fact that any contaminants are more likely indicative of naturally-occurring background levels or other unrelated activities."

Is this an accurate statement?

Also, I just want to be clear: Has the EPA made any determination about the source of any contaminants detected in the Dimock water?

Thanks,

Laura Legere
